Shocking revelations regarding threats to national security

By Jill Jones

Gold Canyon resident and law enforcement expert Dr. Glenn Walp recently released his book, *Implosion at Los Alamos*, based on his role as head of security at Los Alamos National Labs (LANL) in New Mexico following the 9/11 attacks in New York in 2002.

Retired as Commissioner of the Pennsylvania State Police, Walp felt the need to serve his country post 9/11. No longer at an age for military service, he was hired to head up the LANL Office of Security Inquiries. He immediately became aware of serious policy and security breaches at LANL that he believed could be putting our country's nuclear weapons secrets and national security in jeopardy; many of which remain unresolved even today.

Walp and second-in-command Steve Doran uncovered millions of dollars in thefts, major security breaches, missing computers, corruption and cover-ups at the very facility that was entrusted with our national nuclear security secrets – secrets that could very well now be in

the hands of our enemies.

Determined to stop the sieve of information leaking from the lab, Walp and Doran implemented policy and procedure changes designed to halt the flow of thefts and security breaches. Try as they might, their efforts were stymied by lab officials who were content with things the way they were and who feared any negative publicity would jeopardize their positions. Walp and Doran were told to halt their efforts or risk losing their jobs.

Faced with choosing between national security and job security, Walp and Doran decided to put national security ahead of their pocketbooks and continued with their efforts, which eventually lead to the loss of their jobs, a lengthy legal battle, three congressional hearings and an inquiry by the U.S. Department of Energy into national labs across the country.

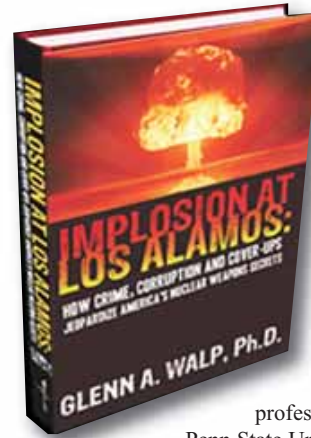

Walp says his quest in releasing *Implosion at Los Alamos* is to bring the ongoing problem with national security to the attention of President Obama and other leaders so appropriate steps can be taken to protect nuclear weapons secrets from falling into the hands of countries and factions

ill-equipped to handle the enormity of the associated knowledge and power.

Implosion at Los Alamos is a compelling and gut-wrenching book, sure to open the eyes of readers and, hopefully, national and world leaders. In this era of "shock and awe", this book is nothing less than shocking and awe inspiring.

Walp was Commissioner of the Pennsylvania State Police and member of the governor's cabinet. He holds a Ph.D. in Human Services with a specialization in criminal justice. He has appeared as a guest on various national television programs and is an adjunct

professor and consultant for the Penn State University Justice and Safety Institute. He is also a member of the International Association of Chiefs of Police Executive Search Team. Walp's previous academic works have been published in various venues including the FBI Law Enforcement Bulletin. Copies of *Implosion at Los Alamos* can be obtained at www.implosionatlosalamos.com.
